russell.w.schwartz@gmail.com  
443-472-8770

## EDUCATION

**Carnegie Mellon University** Aug 2022 – Dec 2023  
*Master of Science in Computer Science* Pittsburgh, PA

**University of Maryland** (GPA: 4.0) Aug 2018 – May 2022  
*Bachelor of Science in Computer Science* College Park, MD  
*Bachelor of Science in Mathematics*

## PROFESSIONAL EXPERIENCE

**Astrobotic Technology** May 2023 – Present  
*Perception Software Engineer III* Pittsburgh, PA

- Developed perception algorithms for autonomous terrain-relative navigation and hazard-detection for the Griffin lunar lander
- Implemented flight software in C++ responsible for real-time sensor data processing, filtering, and decision making aboard the spacecraft
- Worked with a variety of sensors: monocular camera, stereo cameras, LiDAR, doppler LiDAR, IMU, sun-tracker, star-tracker
- Utilized modern robotics methods: feature extraction, visual odometry, fiducials, ICP, global pointcloud registration, Gaussian processes, surface meshes, uncertainty propagation, kalman filtering
- Developed Python prototypes and simulations for early-stage testing and supported field testing of later-stage integrated systems

**Johns Hopkins Applied Physics Lab** May 2021 – Aug 2021  
*Intelligent Systems Intern* Laurel, MD

- Developed tooling in Python and C++ to optimize motion planning for aircraft under complex objective functions involving the communication between an onboard device and an orbital satellite
- Utilized modern non-linear solvers in conjunction with legacy high-fidelity physics simulations

**NASA Jet Propulsion Lab** Jan 2021 – April 2021  
*Robotics & Autonomy Intern* Pasadena, CA

- Worked with the Mars 2020 team to investigate methods for ground-level terrain-relative navigation using onboard rover cameras
- Developed robust methods for extracting salient terrain features from imagery via semantic segmentation as well as conventional vision techniques
- Modeled the effectiveness of using observed features in conjunction with an accurate map to estimate rover pose

## SKILLS

### Languages

Python C++17 Rust C# Java  
JavaScript Matlab

### Frameworks

Numpy OpenCV Open3D Eigen PCL  
GDAL PyTorch Scikit-learn cFS ROS 2

### Technical

Git Jira Docker CMake L<sup>A</sup>T<sub>E</sub>X

### Non-Technical

Mathematical modeling Requirement tracking  
Data visualization Technical communication

## RESEARCH EXPERIENCE

**CMU Robotics: AART Lab** Sep 2022 – Feb 2023

Evaluated methods (both classical and learning-based) for coordinating a team of robots for exploration and monitoring of dynamic environments modeled as a mixture of Gaussians. Developed controllers for a swarm of Khepera mobile robots.

**UMD Robotics: RAAS Lab** Aug 2019 – May 2022

Investigated task-allocation algorithms for multi-agent robotic systems operating in highly failure-prone (and adversarial) environments, where cooperation leads to higher chance of success. Presented findings at RSS 2020.

**UMD LEMMA Group** Aug 2018 – May 2022

Worked with early large language-model BERT to develop novel methods for detecting extremist content in niche online communities. Implemented tooling for processing large (>50TB) datasets and for fine-tune training of the model.
